DEFINITIONS

Sessions

The period of time a user is active on the site. By default, if a user is inactive for 30 minutes or more, any future activity is attributed to a new session. Users that leave the site and return within 30 minutes are counted as part of the original session. This metric gives an exact estimate of the number of times visitors opened EuroVelo website(s).

Users

A visitor to the website(s). Google Analytics keeps track of visitors on the website by automatically creating a user ID. The browser stores this ID as a cookie.

Device categories

Shows the percentage of sessions by device type, typically divided into desktop (PC, laptop) and mobile (smartphone, tablet, wearables) devices.

Traffic channels

Shows the percentage of sessions by their acquisition method. Users typically start a session by arriving to the website(s) through organic (search engine), direct, referral (other website) or social (Facebook, Twitter, etc.) channels. Users arriving through paid advertising are counted separately. During 2019, only one paid campaign was run for the EuroVelo web platform, specifically for EuroVelo 10.

Countries

Shows the number of sessions from a particular country for either the whole EuroVelo web platform or specific routes websites.

EuroVelo is the European cycle route network – a network of 16 long distance cycle routes that connect the whole continent. The network is developed and coordinated by the European Cyclists' Federation (ECF) and it is envisaged that the total length of the network will be almost 90,000 km when completed. The routes can be used by long-distance cycle tourists, as well as by local people making daily journeys.

Route information, maps, guides and other resources available at www.eurovelo.com
